### **Kathleen Bonal PhD**

I received my PhD in Clinical Psychology from the University of Massachusetts at Amherst, and I did my internship at the V.A. Medical Center in West Haven, Connecticut. I have a strong interest in training, starting with training interns at the Institute of Living in Hartford, Connecticut (Hartford Hospital's Mental Health Network), and now training interns. I have been working in adult psychiatry for Kaiser Permanente in San Jose since 2001. My clinical interests include OCD, eating disorders, and projective testing.

## **Ruth Nevo, Ph.D.**

I received my Ph.D. in Clinical Psychology from Palo Alto University in 2003 (at that time known as Pacific Graduate School of Psychology). I completed my post – doc toral training within Kaiser Permanente Adult Psychiatry (Mountain View, CA). Prior to that I had a two-year specialized training internship in trauma treatment at the Trauma and Recovery Center in S.F and San Francisco General Hospital. I completed my undergraduate education in Tel-Aviv, Israel, where I was born and raised. I have advanced training in EFT (Emotional Focused Therapy) and find it very effective in my work in all treatment modalities. I also have special interest and experience in DBT.

## **David Severin, PhD**

I graduated from Georgetown University and earned his PhD in Clinical Psychology from Palo Alto University. I completed a two-year postdoctoral fellowship at UC Davis Department of Neurology specializing in neuropsychology. I have worked as a Staff Neuropsychologist in the San Jose Kaiser Permanente Department of Psychiatry and Memory Clinic for the past 12 years. I enjoy mentoring interns in the field of brain injury, assessment, and recovery.

## **Ashley Stokke, PsyD**

I earned my bachelor's degree at the University of Minnesota, and obtained my Doctorate Degree in clinical psychology, at John F. Kennedy University, in Pleasant Hill, CA. I was fortunate to receive my pre-doctoral internship training at an inpatient psychiatric hospital in Sacramento. There, I was able to train and work in a multi-disciplinary team and work with patients from child/adolescents, adults, and intensive care units. I was able to conduct individual and group therapies, provide case management, and psychological assessments. I moved on to do my post-doctoral training at Kaiser Permanente Child & Adolescent Services in San Jose, where I continue to work as a staff psychologist. I find that I particularly enjoying working with families with children/teens who struggle with Autism Spectrum Disorders and depression. I tend to conceptualize cases from a psychodynamic perspective and utilize more integrative approaches from evidence-based practices in my work with families. I have been supervising since 2015
